LED sijalica

V: 12 - 14V

Power: 1.2W

LED: 12

ЖИВОТЕН ВЕК 5000 h

Сијалицата е со бела светлина и потполно ладна (без загревање). Има минимална потрошувачка така да и потребите за трансформатор се минимални.

LED sijalica za
220V~

LAMP GU1020LHQ with 20LED's is designed in a shape of halogen lamps with GU10/230V~ base. The advantage is the low power consumption 3,2W the very long life time close to 50.000 hours and the very low temperature.

The light temperatur is cool white. Ideal for illumination at places where it's not necessary to have high brightness but continuously light also for show room to spot products.

Voltage: 220-240~

Power: 3.2W

LED: 20

HDMI ADAPTOR KABEL

This is a cable from HDMI to DVI. This cable is made for connecting the two most used digital connectors, be aware that DVI only can transmit video signals and no sound. For example a DVD player, Home cinema sets, LCD TV and PLASMA TV

Connections: 19pins - DVI male
color: black
length: 1.5m

HDMI cable, 19pins - 19pins, 5.0m

High-Definition Multimedia Interface (HDMI) is rapidly emerging as the connection standard for HDTV. HDMI combines high-definition video and multi-channel audio in a single digital interface to provide crystal-clear digital quality over a single cable.

HDMI offers significant advantages over analog A/V connections, including the ability to transmit uncompressed digital video and audio content.

Sweex Manageable UPS 500 VA

With the UPS, you can prevent computer crashes, since the UPS offers a buffer between the mains supply and your computer. You can even connect your telephone line to the UPS to protect against surges in the telephone network. If the battery power falls to exceedingly low levels, you will be warned with an acoustic signal.

This 500 VA UPS offers you a maximum backup time of 12 minutes, depending on the load. You can connect up to 3 devices to this UPS. With the software that is supplied with this UPS, you can make settings for shutdowns and restarting.

The device has been designed in such a manner that, if necessary, the battery can easily be replaced in one action. The operation of this device can also be expanded with an advanced management program.

The inverter for CCF
Lamps can drive two lamps
with a maximum length of
400mm. The input voltage
is 12Vdc and by drive two
lamps the input current is
approximately 750mA. The
output voltage is maximum
1800Vrms for ignition and
between 800Vrms and
1200Vrms (depends on
lamp type) drive voltage.
Attention depending on the
high voltage the inverter can
produce it is very important
to mount them so that
nobody can touch the area
where the lamp connectors
are, because there is the
high voltage.

CCF LAMP FOR 17"
TFT SCR

Cold Cathode Fluorescent Lamp
for repair for 17" TFT-LCD
monitors. Diameter 2.6mm and
320mm length inclusive harness
set and 2 silicon caps for
isolation. The harness set is not
mounted to be more flexible in
case of installation. The life
time is approximately 15,000
hours. To drive this kind of
lamp it's necessary to use an
inverter. For repair by TFT-
LCD monitors normally the
original inverter can be used.
Otherwise please use our INV-
CCF122C. Attention by use this
device the output voltage is
between 1200 and 1800Vrms

LED sijalica za 220V~

LAMP GU1020LHQ with 20LED's is designed in a shape of halogen lamps with GU10/230V~ base. The advantage is the low power consumption 3,2W the very long life time close to 50.000 hours and the very low temperature. The light temperatur is cool white. Ideal for illumination at places where it's not necessary to have high brightness but continously light also for show room to spot products.
